

OUR FOUR FUNDAMENTAL QUALITY PILLARS - IDENTIFYING GLOBAL BEST OF BREED BUSINESSES

INVESTMENT OBJECTIVE

The Fund is a feeder fund investing only in the Stonehage Fleming Global Best Ideas Equity Fund ("Master Fund"), managed by Stonehage Fleming Investment Management Limited in the United Kingdom. The Master Fund seeks to achieve long-term growth in capital and income in a focused portfolio of high quality listed businesses from around the world.

INVESTMENT PHILOSOPHY

We invest in best of breed businesses for their quality, strategic competitive edge and value.

FUND COMMENTARY

Our philosophy is designed to buy outstanding quality businesses that can grow on a sustainable basis. The intention is to hold them until they may become overvalued. McDonald's has been in the Fund's list of top ten holdings for a long time.

It is often the sustainability of a simple business model that delivers better than what many may expect. In the case of McDonald's, the model is to own the majority of the restaurant properties and to franchise the restaurant operations to independent franchisee groups. Dividends are funded only from rent income, with any excess rent and the franchise royalty income utilised to reinvest in the business, to cover marketing and relatively low operating costs and to buy back shares.

As simple as this model may sound, it is very supportive of sustainable growth in different forms. It creates an ideal landlord-tenant relationship in the sense that they are practically business partners working in the best interests of both parties. It also creates a very stable cash flow stream, with less risk of losing a tenant than in most other property businesses. The discipline of paying dividends only from rent income creates a cash flow buffer to finance future growth.

Of course, enduring success of the restaurants is absolute key for continuing organic growth. In this context, McDonald's invested heavily in product quality and evolved its menu to offer healthy choices, while its scale ensures competitive pricing of its products. Home delivery also has become a new growth avenue.

The share delivered a total return of +21.3% p.a. over the past five years, compared to +6.9% p.a. for the MSCI World AC index and +11.1% p.a. for the S&P 500 index (all in US\$ terms). The dividend has been raised each of the past 43 years, making it one of the world's few Dividend Aristocrats.

INVESTMENT STRATEGY

- Invest for sustainable organic growth
- Fundamental research driven
- Particular focus on quality of management, balance sheet strength, return on invested capital, free cash flow generation, ability to grow dividends each year
- Bottom-up approach to identify exceptional businesses
- Global orientation, with emerging market exposure
- High conviction concentrated portfolio
- Predominantly larger capitalisation businesses, also consider exceptional medium-sized ones
- Buy to hold and disciplined selling
- No benchmark orientation, no active trading, no leverage, no hedging

¹ Advice fees are negotiable between the client and their adviser. Annual advice fees are paid through a re-purchase of units from the investor. The fund is available through certain LSPs which levy their own fees. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TERs. The TER and TIC is an estimated value of the cost to manage the fund. The actual cost ratios will be displayed once the fund has attained sufficient performance history. Transaction Costs are a necessary cost in administering the Financial Product and impacts Financial Product returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Financial Product, the investment decisions of the investment manager and the TER. Disclosed performance information is calculated after all fees and costs deducted. ² All fees inclusive of VAT where applicable.

DISCLOSURES AND ADDITIONAL INFORMATION

A Feeder Fund is a portfolio that invests in a single portfolio of a collective investment scheme, which levies its own charges and which could result in a higher fee structure for the Feeder Fund.
