

INVESTMENT OBJECTIVE

To achieve long term growth in capital and income by developing a focussed portfolio of high quality listed companies from around the world.

FUND MANAGER'S COMMENT

We received more inflows from new investors during the month and immediately invested the new Cash. Your Cash holding was, therefore, at miniscule levels through the month. The earlier than generally expected first tapering of US quantitative easing encouraged equity investors, realising that global economic recovery may be well on track.

Another new position was added in the course of the month, taking your total number of businesses to 24. This takes us closer to the maximum number of positions we would like to hold under current market conditions. The smallest position is at 2.4%, reflecting our high conviction style of investing. There is room for another single few businesses, but we are slowly approaching a situation that a potential new entrant will have to be of such quality and value that it can push out an existing business from your portfolio.
