**FUND COMMENTARY**

February delivered a weak global equity market result, with the S&P 500 index wiping out its gains since the US election in November. US stock market volatility increased sharply, with the VIX volatility index rising above the one-year average level. This is in contrast to many European stock markets delivering strong year-to-date performances. This weak US performance is also in contrast to strong US company results for the fourth quarter. The S&P 500 index constituents delivered +5% top-line and +13% earnings per share growth. These are respectively +1% and +7% better than consensus expectations.

This year's January and February performances both correlate well with historic norms following a US election, with generally a strong January followed by a weak February. The weak February performance is also put in the context of new employment numbers dropping close to their long-term average, the 10-year Treasury yield dropping, headline inflation rising to 3.0%, Bitcoin dropping over a fifth since its peak and President Trump confirming a range of tariffs, amongst which (seemingly) 25% on both Canada and Mexico and a further 10% on China. Some leading US economic indicators have weakened, but remain constructive. Part of this may though follow from stronger Manufacturing pre-empting the implementation of tariffs.

The best contributors to performance over the month were EssilorLuxottica, Arthur J Gallagher and Visa. The launch last year of the Ray-Ban branded smart glasses in partnership with Meta is starting to benefit EssilorLuxottica's organic growth, and their Nuance branded glasses, with built-in hearing support, have very good potential. Investors buy in to Gallagher's largest ever acquisition currently in process. Visa benefits from its status as a good US inflation hedge.

The largest detractors from performance have been Alphabet, Amazon and Cadence Design systems. Whilst all three businesses have strong earnings growth outlooks, the Technology sector broadly suffers from new uncertainties around the DeepSeek announcement from China of much higher AI efficiencies than at US peers.

**GLOBAL BEST IDEAS EQUITY FUND**

**OUTCOME OF FAIR VALUE ASSESSMENTS (2024)**

Our assessment confirms:

- The fund meets the needs of the target market.
- The intended distribution strategy remains appropriate.
- The fund provides fair value to customers.

**INVESTOR PROFILE**

The fund is appropriate for all investor types, including those with only a basic knowledge of funds. It is compatible with investors who do not need a capital guarantee (investors must be prepared to accept fluctuations in the value of capital, including the ability to bear 100% capital loss) and are seeking capital growth. Due to the volatility of markets, investors should be willing to accept price fluctuations in exchange for the opportunity of potentially higher returns. This is a long term investment and investors should have an investment time horizon of at least 5 years. The recommended holding period does not provide any guarantee that the objective will be achieved. This product is eligible for all distribution channels (e.g. investment advice, portfolio management, non-advised sales and pure execution services).

The fund is unlikely to be appropriate for those who:

- Are looking for full capital protection or full repayment of the amount invested, and those who want a guaranteed return
- Have no risk tolerance
- Who are unwilling to accept price fluctuations (volatility) in the value of the fund
- Do not intend to invest for the long term

**RISK PROFILE**

The Fund is not guaranteed and your investment is at risk. The value of your investment may go down as well as up. The Fund may enter into derivative agreements with counterparties, and consequently there is a risk that a counterparty may fail to meet its obligations. This may lead to delays in the Fund receiving amounts due to it, receiving less than is due or receiving nothing. As the Fund has exposure to overseas securities, movements in exchange rates may, when not hedged, cause the value of your investment to increase or decrease. The Fund invests in equity and equity related securities which are subject to various risks including fluctuations in market prices, adverse issuer or market information and the fact that equity and equity related securities are subordinate in the right of payment to other corporate securities, including debt securities. The value of equity securities varies with the performance of the respective issuers and movements in equity markets generally. As a result, the Fund may suffer losses if it invests in equity of issuers where performance falls below market expectations or if equity markets in general decline or the Fund has not hedged against such a general decline. The Fund may hold a relatively small number of stocks (approximately 20 to 30 positions) as compared to many other funds. This may make the Fund's performance more volatile than would be the case if it had a more diversified investment portfolio. For full details of the Fund's risks, please see the prospectus and supplement sections entitled 'Risk Factors'.
