**INVESTMENT PHILOSOPHY**

**INVESTMENT OBJECTIVE**

The Fund is a feeder fund investing only in the Stonehage Fleming Global Best Ideas Equity Fund (“Master Fund”), managed by Stonehage Fleming Investment Management Limited in the United Kingdom. The Master Fund seeks to achieve long-term growth in capital and income in a focused portfolio of high quality listed businesses from around the world.

**INVESTMENT PHILOSOPHY**

We invest in best of breed businesses for their quality, strategic competitive edge and value.

**FUND COMMENTARY**

The S&P 500 index has completed one of its five best 65-day (3-month) recoveries since 1950. The S&P Technology index has recovered +48% (in USD terms) since its GVC (Great Virus Crisis) low on 23 March.

Our Fund is well exposed to the Technology sector, with our Technology classified businesses making up the largest sector at a 26.4% weight. Other technology driven businesses that are not officially classified as such (Alphabet, Amazon) make up a further 9.3%. Four of the top five contributors to the Fund’s performance in June (Tencent, Amazon, Microsoft, Adobe) are from this group.

COVID-19 is accelerating the Technology sector’s relevance to the global economy to a major extent. This is particularly the case for Working From Home issues, providing the necessary networks, connections, and computing facilities. This facet further boosts the need for technology enablers in the public cloud, data handling and office automation space.

Along with this, the boost to e-Commerce caused by the global lock-downs has been the largest and quickest windfall any sector has probably ever got. Its share of the overall retail market increased in a matter of weeks by what it earlier achieved in a number of years. Because of virus fears, consumers have also abandoned the use of cash in favour of digital payment almost overnight. The need for food delivery services and general online sales exploded, along with streaming and home entertainment services.

Everyone hopes that effective vaccines will imminently be developed and that GVC can phase out as soon as possible. Even if this best scenario may come to fruition, we think the world and many personal outlooks have changed and that the above scenarios are more long-term structural than short-term tactical in nature. The future has arrived much earlier than expected for many businesses. Our portfolio is well positioned in this context.

**INVESTMENT STRATEGY**

- Invest for sustainable organic growth
- Fundamental research driven
- Particular focus on quality of management, balance sheet strength, return on invested capital, free cash flow generation, ability to grow dividends each year
- Bottom-up approach to identify exceptional businesses
- Global orientation, with emerging market exposure
- High conviction concentrated portfolio
- Predominantly larger capitalisation businesses, also consider exceptional medium-sized ones
- Buy to hold and disciplined selling
- No benchmark orientation, no active trading, no leverage, no hedging

<sup>1</sup> Advice fees are negotiable between the client and their adviser. Annual advice fees are paid through a re-purchase of units from the investor. The fund is available through certain LSPs which levy their own fees. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The TER displayed, which is for the period 1 April 2019 to 31 March 2020, is based on the ASISA methodology, is higher than the expected TER of the fund due to the high weight allocated to past costs prior to the increase in fund size. The estimated actual TER payable by a client investing into the fund today would be 1.70%. Transaction Costs are a necessary cost in administering the Financial Product and impacts Financial Product returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Financial Product, the investment decisions of the investment manager and the TER. Disclosed performance information is calculated after all fees and costs deducted. <sup>2</sup> All fees inclusive of VAT where applicable.

**DISCLOSURES AND ADDITIONAL INFORMATION**

A Feeder Fund is a portfolio that invests in a single portfolio of a collective investment scheme, which levies its own charges and which could result in a higher fee structure for the Feeder Fund. The management of investments is outsourced to Stonehage Fleming Investment Management (South Africa) (Pty) Ltd, FSP 42847 an authorized Financial Services Provider under the Financial Advisory and Intermediary Services Act, 2002.

The Sanlam Group is a full member of the Association for Savings and Investment SA. Collective investment schemes are generally medium- to long-term investments. Please note that past performances are not necessarily a guide to future performances, and that the value of investments / units / unit trusts may go down as well as up. A schedule of fees and charges and maximum commissions is available from the Manager, Sanlam Collective Investments (RF) Pty Ltd, a registered and approved Manager in Collective Investment Schemes in Securities. Additional information of the proposed investment, including brochures, application forms and annual or quarterly reports, can be obtained from the Manager, free of charge.

Collective investments are traded at ruling prices and can engage in borrowing and scrip lending. Collective investments are calculated on a net asset value basis, which is the total market value of all assets in the portfolio including any income accruals and less any deductible expenses such as audit fees, brokerage and service fees. Actual investment performance of the portfolio and the investor will differ depending on the initial fees applicable, the actual investment date, the date of reinvestment of income as well as dividend withholding tax. Forward pricing is used. The Manager does not provide any guarantee either with respect to the capital or the return of a portfolio. The performance of the portfolio depends on the underlying assets and variable market factors. Performance is based on NAV to NAV calculations with income reinvestments done on the ex-div date. Lump sum investment performances are quoted. Source: Money Mate.
