

OUR FUNDAMENTAL QUALITY PILLARS - IDENTIFYING BEST OF BREED BUSINESSES

FUND OBJECTIVE

The objective of this portfolio is to provide above average growth in capital over the medium to long term. Income will be of secondary importance. The risk associated with this portfolio shall be the same as the risk associated with SA equities as an asset class. Volatility of capital can occur over the short-term.

FUND STRATEGY

The portfolio shall invest in assets in liquid form and in securities across all sectors of the JSE Securities Exchange of South Africa as well as international exchanges and other permissible assets allowed by the Act. The portfolio shall be allowed to invest in listed and unlisted financial instruments (derivatives) as allowed by the Act from time to time in order to achieve its investment objective, and shall be permitted to invest in offshore investments as legislation permits. This portfolio will invest predominantly in equities. Apart from the above, the portfolio may also invest in participatory interests of portfolios of local and foreign collective investment schemes.

The fund will be managed with a high conviction approach, typically holding no more than 20 positions at any time. In line with the investment manager's investment philosophy and process, the holdings will be concentrated in selected JSE Top 50 companies with the buy-to-hold management approach encouraging minimal portfolio turnover.

FUND COMMENTARY

Clicks reported its annual results for the year ended 31 August 2020 during October 2020. Revenue increased 9.6% to R34.4 billion and diluted headline earnings per share increased 13.7% to R7.54 – a robust performance in the context of a global humanitarian crisis and a deepening economic recession locally. The accessibility of the Clicks store network proved beneficial, with 74% of stores located in convenience and neighbourhood shopping centres. This largely negated the significant slowdown in footfall at super regional and regional malls across the country. General merchandise market share grew from 19.2% to 16.4% as consumers used Clicks for home spending. Clicks' Baby segment delivered sizeable share gains to extend their market leadership position to 19.7% from 17.0%. In addition, Clicks delivered 1 million medicine parcels for the Department of Health for the first time and now dispenses 25% of South Africa's medicines. Private label sales grew strongly, supporting margin gains in a year where some high margin products experienced disrupted trading.

Mondi released a trading statement for the 3 months ended September 2020. Underlying EBITDA of €306 million was 20% lower year-on-year and 13% lower quarter-on-quarter, largely as expected, given the cyclical nature of the packaging and paper industry. Average input costs were stable over the quarter and management reported that the group is starting to see a pick-up of volumes in key segments (Corrugated, Flexible and Uncoated Fine Paper). The business has now delivered just over €1.0bn in EBITDA for the first 9 months of FY20, positioning it well to deliver in line with full year market expectations. A weaker U.S. Dollar has been flagged by the business as a potential headwind into the final quarter of FY20. Mondi's balance sheet remains robust with €970m in liquidity (€1.4bn at 1H20) after the payment of €237m interim div and €500m Eurobond maturity with no material maturities until 2022. Mondi's cost advantaged asset base and relentless focus on efficient through-the-cycle balance sheet management positions the business well for sustained long term shareholder delivery.
