## PORTFOLIO COMMENTARY

Global equities made further gains in November and rose 2.4%. Developed market equities broadly outperformed those in the emerging markets and were led by US equities, which reached further record highs. Returns from Fixed Income assets were mixed due to the rise in government bond yields which took place over the month. Broadly speaking, lower rated credit outperformed investment grade rated and developed market government debt as investor appetite for riskier assets remained elevated.

Against this backdrop, the GMAP A-USD class returned 1.7% over the month and outperformed the fund's benchmark by 0.3%. The equity portfolio outperformed global equities with positive relative results generated by the Lyrical Fund as well as Orbis. The portfolio also benefited from underweight exposure to defensive equity sectors as the recent pickup in economic activity has supported the performance of more cyclical parts of the market. The Fixed Income portfolio marginally underperformed the Global Aggregate due to its exposure to local currency emerging market debt. The asset class experienced a difficult month of performance as the US Dollar strengthened and investor sentiment was impacted by the civil unrest emanating from Latin America. That said, positive results were generated by the Pimco Income Fund which benefited from a very short duration profile and exposure to the US housing market.

## ACTIVE MANAGERS IN FOCUS

### BlackRock Emerging Markets Local Currency Bond Fund

The BlackRock Emerging Markets Local Currency Bond Fund invests in sovereign debt of developing market countries, aiming to deliver return through EM currency appreciation, bond repricing and yield. The investment process combines global, regional and localised themes in order to generate alpha, as well as managing risk relative to their benchmark. The strategy is managed by three portfolio managers, led by Sergio Trigo Paz since 2009, and supported by the wider research team at BlackRock. Currently the largest regional allocations are in Brazil, South Africa and Indonesia.

### Edgewood US Select Growth Fund

Edgewood manage a concentrated 22-stock portfolio of high growth stocks, driven by intensive bottom-up research. They focus on companies with a strong competitive edge and quality management, with a clear style preference for secular growth stories in the US. Our analysis highlights that they have generated alpha through stock picking across a range of high growth sectors. In addition, their investment team offers greater depth with more experience and longevity than many of their peers. Also critical in this area of the market is valuation discipline, which we also consider to be a differentiating factor for the strategy.

**Past performance is not a reliable indicator of future performance. If the information is not displayed in your base currency, then the return may increase or decrease due to currency fluctuations**
