PORTFOLIO COMMENTARY

Global equities returned 3.6% over the second quarter of 2019 and have now returned 16.2% year-to-date. Positive returns from risk assets over the quarter masked an outbreak of volatility in May following four consecutive months of uninterrupted gains. This was triggered by another escalation of tensions between the US and China over trade, as well as the imposition of US tariffs on Mexico. Market sentiment subsequently improved in June, with equity markets recovering the losses incurred in May. Meanwhile, bond investors continued to benefit from declining yields with positive returns across almost all Fixed Income sub-asset classes.

The Global Multi-Asset Portfolio (A-Class) returned 2.8% in Q2, taking 2019 returns so far to 10.7%. Over the quarter, our managers favouring high growth companies performed most strongly. The SF Global Best Ideas Fund was one of the best relative performers, outperforming global equity markets by 2.9%, as a number of positions in the Technology sector contributed positively. Our managers focussing on the more cyclical sectors of the market experienced a more difficult period of performance. The Lyrical Fund remained behind US markets over the quarter despite an impressive rally in June, whilst Orbis lagged global markets by 2.7%. Within Fixed Income, the Blackrock Emerging Markets Debt position was the best performer, returning 4.5% over the quarter, benefiting from a rally in several EM currencies.

ACTIVE MANAGERS IN FOCUS

PIMCO Income Fund

This fund offers diversified exposure to fixed income markets, managed by PIMCO, the largest global bond manager. The portfolio is divided into two general sections. Firstly, higher yielding assets, which include corporate credit, mortgage backed securities and Emerging Market debt. These assets are expected to perform well during periods of robust economic growth. Secondly, higher quality assets, which currently consists mainly of government bonds in the US and Australia. These positions provide a balance to the portfolio, benefiting from periods of weaker economic growth or market turbulence. We have a high opinion of the management team and consider the strategy to have strong potential for long term outperformance over fixed income markets.

Lyxor/Sandler US Equity Fund

Sandler is a broad market US long/short specialist with over 20 years' experience running this strategy. Portfolio construction is more dynamic than peers in terms of both stock selection and the management of net exposure; the latter is calibrated by their views of the top down environment, with special consideration given to the credit cycle. The strategy does have a Growth bias, which we feel the manager has the ability to moderate when the environment becomes less constructive. This should also contribute as a diversifier for the Value leaning characteristics of much of our existing US exposure.

Past performance is not a reliable indicator of future performance. If the information is not displayed in your base currency, then the return may increase or decrease due to currency fluctuations

IMPORTANT INFORMATION

The Fund is a sub-fund of the Stonehage Fleming Pooled Investments (Ireland) plc (the "Company"), an open-ended umbrella investment company with variable capital and segregated liability between Funds incorporated with limited liability in Ireland under the Companies Act 2014 with registration number 525228.
