## PERFORMANCE DISCLOSURE

Past performance is not a guide to future performance. The value of investments can fall. Investors may not get back the amount invested. Income from investments may vary and is not guaranteed. The return may increase or decrease due to currency fluctuations. For a full list of risks applicable to this fund, please refer to the Prospectus.

## CHIEF INVESTMENT OFFICER

**Graham Wainer**

Graham is CEO and Head of Stonehage Fleming Investment Management in London. He is also CIO and Chairman of the Investment Committee. Prior to joining the Group, Graham was GAM's Group Head of Investments – Multi Asset

Class Solutions and Chairman of GAM's Investment Advisory Board where he had overall responsibility for the firm's discretionary mandates and related co-mingled funds.

## PORTFOLIO MANAGER

**Peter McLean CFA**

Peter is a Director in Stonehage Fleming Investment Management and a member of the Investment Committee, responsible for the management of our multi-asset investment offering. His main focus is on global economic and market dynamics, and their implications for the deployment of client capital across portfolios.

## INVESTMENT OBJECTIVE

The objective is to achieve capital growth in real terms over the longer term.

## INVESTMENT STRATEGY

- We construct globally orientated portfolios of long term investment ideas.
- We blend passive, factor and active market exposure targeting a robust multi-asset solution.
- We are conviction investors with all investments carefully assessed for purpose and clarity.

## PORTFOLIO COMMENTARY

After a strong start to 2019 equity markets retreated in May as geopolitical tensions dominated sentiment. Investors expecting a resolution to the US / China trade war were disappointed, as President Trump increased tariffs on Chinese imports and threatened a significant escalation if concessions are not met. As concerns of a negative impact to global growth increased, global equity markets fell by 2.9% (in GBP), while bond investors benefited from a decline in yields.

The Global Growth fund returned -3.6% in May, taking 2019 returns so far to 8.0%. We saw good results from those managers favouring high growth companies, where their defensive characteristics were advantageous. Stonehage Fleming Global Best Ideas and Findlay Park American outperformed their benchmark for the month and for 2019 overall. The more cyclical managers struggled in this environment, however, with Lyrical and Orbis Global Equity having a particularly difficult time. Outside of equities, the Blackrock Emerging Markets Debt position was a strong contributor, benefiting from a weaker Sterling as EM currencies strengthened.

We introduced the Lyxor Core MSCI World ETF in May, a global passive strategy offering broad and efficient exposure to large cap equities. Concurrently we redeemed smaller, regional positions in Asia and the US, retaining the overall asset allocation of the portfolio.

## ACTIVE MANAGERS IN FOCUS

The portfolio blends a mix of active, passive and factor strategies. Approximately 57% of the portfolio is invested in active managers where our conviction is the strongest. Below we outline two examples.

### PIMCO Income Fund

This fund offers diversified exposure to fixed income markets, managed by PIMCO, the largest global bond manager. The portfolio is divided into two general sections. Firstly, higher yielding assets, which include corporate credit, mortgage backed securities and Emerging Market debt. These assets are expected to perform well during periods of robust economic growth. Secondly, higher quality assets, which currently consists mainly of government bonds in the US and Australia. These positions provide a balance to the portfolio, benefiting from periods of weaker economic growth or market turbulence. We have a high opinion of the management team and consider the strategy to have strong potential for long term outperformance over fixed income markets.

### Lyxor/Sandler US Equity Fund

Sandler is a broad market US long/short specialist with over 20 years' experience running this strategy. Portfolio construction is more dynamic than peers in terms of both stock selection and the management of net exposure; the latter is calibrated by their views of the top down environment, with special consideration given to the credit cycle. The strategy does have a Growth bias, which we feel the manager has the ability to moderate when the environment becomes less constructive. This should also contribute as a diversifier for the Value leaning characteristics of much of our existing US exposure.

## IMPORTANT INFORMATION

Derivatives may be used for efficient portfolio management. The Fund invests in assets which are dominated in other currencies; hence changes in relevant exchange rate will affect the value of the investment.
