

OUR FUNDAMENTAL QUALITY PILLARS - IDENTIFYING BEST OF BREED BUSINESSES

FUND OBJECTIVE

The objective of this portfolio is to provide above average growth in capital over the medium to long term. Income will be of secondary importance. The risk associated with this portfolio shall be the same as the risk associated with SA equities as an asset class. Volatility of capital can occur over the short-term.

FUND STRATEGY

The portfolio shall invest in assets in liquid form and in securities across all sectors of the JSE Securities Exchange of South Africa as well as international exchanges and other permissible assets allowed by the Act. The portfolio shall be allowed to invest in listed and unlisted financial instruments (derivatives) as allowed by the Act from time to time in order to achieve its investment objective, and shall be permitted to invest in offshore investments as legislation permits. This portfolio will invest predominantly in equities. Apart from the above, the portfolio may also invest in participatory interests of portfolios of collective investment schemes registered in the Republic of South Africa or of participatory interests in collective investment schemes.

The fund will be managed with a high conviction approach, typically holding no more than 20 positions at any time. In line with the investment manager's investment philosophy and process, the holdings will be concentrated in selected JSE Top 50 companies with the buy-to-hold management approach encouraging minimal portfolio turnover.

FUND COMMENTARY

During the month of August a position in Clicks Group was added to the fund.

Clicks began operating as a corporate pharmacy when regulation allowed in 2003. Today, the business is a co-leader in dispensary with 23% market share in South Africa from 640 Clicks stores. The group's designated service provider status to medical aid schemes drives footfall into the dispensary and 'front shop'.

Clicks leads the market in low dispensing fees, loyalty members, private label and promotional items. Segment market leadership is held in Personal Care & Beauty as well as Baby Care. Over the decade, trading area has grown 50% to 300,000sqm and trading density expanded to R90,000/sqm.

Vertical integration is a competitive advantage. Subsidiary UPD, is the leader in wholesale and pre-distribution of pharmaceuticals with a 26% market share. The group also owns a generic pharmaceutical product marketer called Unicorn, which distributes generic drugs produced by third party manufacturers. Private label medicine now constitutes 5% of the generics dispensed by Clicks.

Management have consistently met or exceeded targets on store, space, revenue and profitability growth. Capital allocation has been excellent over the past decade, with dividends per share growing over 500%. Strategy execution continues under CEO Vikesh Ramsunder.

Clicks has one of the best operating cash flow margins of drugstore chains anywhere in the world, recently surpassing industry giant Walgreens Boots Alliance. Cash generation is reliably 130% of earnings enabling high dividend pay-outs whilst funding organic growth. Returns on net tangible assets of 18% are superior to global listed peers.

Growth drivers include strong sector growth, consolidation of independents and market share gains across front shop categories. Clicks has identified locations to expand their footprint to 900 in the coming years.

The fund purchased its stake at a fair value for this first class asset, which we expect to grow shareholder value substantially over the long term.

The Sanlam Group is a full member of the Association for Savings and Investment SA. Collective investment schemes are generally medium- to long-term investments. Please note that past performances are not necessarily a guide to future performances, and that the value of investments / units / unit trusts may go down as well as up. A schedule of fees and charges and maximum commissions is available from the Manager, Sanlam Collective Investments (RF) Pty Ltd, a registered and approved Manager in Collective Investment Schemes in Securities. Additional information of the proposed investment, including brochures, application forms and annual or quarterly reports, can be obtained from the Manager, free of charge. Collective investments are traded at ruling prices and can engage in borrowing and scrip lending. Collective investments are calculated on a net asset value basis, which is the total market value of all assets in the portfolio including any income accruals and less any deductible expenses such as audit fees, brokerage and service fees. Actual investment performance of the portfolio and the investor will differ depending on the initial fees applicable, the actual investment date, the date of reinvestment of income as well as dividend withholding tax. Forward pricing is used. The Manager does not provide any guarantee either with respect to the capital or the return of a portfolio. The performance of the portfolio depends on the underlying assets and variable market factors. The fund manager may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. Performance is based on NAV to NAV calculations with income reinvestments done on the ex-div date. Lump sum investment performances are quoted. Source: Money Mate.
