PORTFOLIO COMMENTARY

The Global Balanced Portfolio returned 2.1% in December, taking 2020 returns to 4.6%. Vaccine rollouts and additional fiscal stimulus in the US led to a strong end to the year. UK equities outperformed, with a Brexit deal being secured late in December. Vaccine optimism favoured riskier fixed income assets, including emerging market local currency debt, where gains were supported by a weaker dollar.

We continued to see outperformance from equity managers focused on smaller companies and those with a high degree of cyclicality. Lyrical, our US value manager, had particularly strong returns. Within fixed income, we saw good returns from our managers focused on credit, with PIMCO Income and BlueBay Global Investment Grade Corporate Bond outperforming relative to their benchmarks.

ACTIVE MANAGER IN FOCUS

The **Sector Healthcare Value Fund** is a global active healthcare strategy which invests across the market cap spectrum and has a strong valuation-driven discipline to stock selection. We believe the healthcare sector itself has many attractive characteristics including long-term growth prospects and a differentiated return profile to other allocations within the equity portfolio. Over the long term the management team have delivered strong outperformance of the broad healthcare space. Currently, the manager emphasizes pharmaceuticals, equipment and supplies, and biotech, with Sanofi, GlaxoSmithKline and Bristol-Myers Squib representing top stock positions.
