PORTFOLIO MANAGER PERFORMANCE

PORTFOLIO COMMENTARY

The Global Balanced Portfolio returned +3.6% in December, taking returns for 2023 overall to +6.5%.

Financial markets rose in December, continuing November's rally as investors raised bets on lower policy rates next year. Markets were buoyed by continued progress on inflation and an acknowledgment that Federal Reserve policymakers had begun discussing interest rate cuts. Whilst there was strength across global equities, smaller companies outperformed, based on the ongoing easing of financial conditions and relative weakness earlier in 2023. Bond markets rallied thanks to falling sovereign yields and tighter credit spreads, whilst broad commodity indices fell as the oil price declined.

The strongest performers were Dimensional and Driehaus, which emphasise smaller companies, whilst the main laggards were the Vanguard Emerging Markets ETF and the SF Global Best Ideas Fund (GBI). GBI had a strong November and has performed in line with its benchmark for 2023 overall, whilst weak sentiment to China has weighed on EM positions. Within bonds, the long-dated UK Gilt performed strongly, whilst Pimco Income lagged its benchmark due to a lower duration positioning. In alternatives, The GAM Star Cat Bond rose again in December, capping off a strong year in which the fund had benefitted from a firm pricing environment and relatively small losses in the space.

INVESTOR PROFILE

The fund is appropriate for all investor types, including those with only a basic knowledge of funds, it is compatible with investors who do not need a capital guarantee (investors must be prepared to accept fluctuations in the value of capital, including the ability to bear 100% capital loss) and looking for capital growth.

Due to the volatility of markets, investors should be willing to accept price fluctuations in exchange for the opportunity of potentially higher returns. This is a long term investment. Investors should have an investment time horizon of at least 5 years. The recommended holding period does not provide any guarantee that the objective will be achieved. This product is eligible for all distribution channels (e.g. investment advice, portfolio management, non-advised sales and pure execution services).

The fund is unlikely to be appropriate for those who:

- Are looking for full capital protection or full repayment of the amount invested, and those who want a guaranteed return
- Have no risk tolerance
- Who are unwilling to accept price fluctuations (volatility) in the value of the fund
- Do not intend to invest for the long term
