## PORTFOLIO MANAGER PERFORMANCE

## PORTFOLIO COMMENTARY

**The Global Balanced Portfolio returned 1.5% in July, taking year to date returns to 3.0%.**

Global equities rose in July as inflation fell and economic data positively surprised in the US. Market breadth improved, with medium and smaller sized companies, and those trading on lower valuations, performing strongly. Fixed income markets were flat, with Credit outperforming government bonds as risk appetite strengthened. Commodities performed well across the board, particularly Oil.

The leading equity holdings in the month were those with a bias towards smaller and medium sized companies, such as Dimensional and Driehaus. Both outperformed regional markets thanks to positive stock selection within Financials (Dimensional) and IT (Driehaus). Increased market breadth also coincided with stronger performance from our more international (ex-US) holdings, such as GLG UK Undervalued Assets and Vanguard Emerging Markets. It was a more difficult month, however, for Sector Healthcare Value, which tends to lag markets when risk appetite strengthens, given its defensive characteristics. Fixed income contributed positively to performance, driven by the UK government bond allocation, which rose as inflation softened in the region. Pimco also outperformed its benchmark thanks to its overweight credit and underweight duration exposure. The iShares Bloomberg Commodity Fund performed strongly in July, with all sub groups of the fund contributing.

**INVESTOR PROFILE**

The fund is appropriate for all investor types, including those with only a basic knowledge of funds, it is compatible with investors who do not need a capital guarantee (investors must be prepared to accept fluctuations in the value of capital, including the ability to bear 100% capital loss) and looking for capital growth.

Due to the volatility of markets, investors should be willing to accept price fluctuations in exchange for the opportunity of potentially higher returns. This is a long term investment. Investors should have an investment time horizon of at least 5 years. The recommended holding period does not provide any guarantee that the objective will be achieved. This product is eligible for all distribution channels (e.g. investment advice, portfolio management, non-advised sales and pure execution services).

The fund is unlikely to be appropriate for those who:

- Are looking for full capital protection or full repayment of the amount invested, and those who want a guaranteed return
- Have no risk tolerance
- Who are unwilling to accept price fluctuations (volatility) in the value of the fund
- Do not intend to invest for the long term
