PORTFOLIO MANAGER PERFORMANCE

PORTFOLIO COMMENTARY

The Global Growth Portfolio returned +0.9% in January

After rallying in Q4, global equities delivered moderate gains in January, with strong performance from US and Japanese equities offset by declines in Asia and the UK. Strong US economic data supported sentiment but caused investors to lower expectations of early interest rate cuts. Technology was the best-performing sector, driven by US mega caps, whilst smaller companies and the more rate-sensitive sectors underperformed. Tighter credit spreads limited losses in Fixed Income as government bond yields rose, whilst Energy performed well within Commodities as geopolitical tensions remained high.

Within equities, strong performance from the SF Global Best Ideas fund (GBI) and US manager Driehaus offset weakness from smaller cap and international managers Dimensional and Veritas. The UK sovereign bond allocation declined, whilst Pimco Income outperformed its benchmark due to a lower duration positioning. 3i Infrastructure and Blackrock APAC Absolute Return both delivered market-beating returns within Alternatives, but the Gold position fell as the dollar strengthened.

INVESTOR PROFILE

The fund is appropriate for all investor types, including those with only a basic knowledge of funds, it is compatible with investors who do not need a capital guarantee (investors must be prepared to accept fluctuations in the value of capital, including the ability to bear 100% capital loss) and looking for capital growth.

Due to the volatility of markets, investors should be willing to accept price fluctuations in exchange for the opportunity of potentially higher returns. This is a long term investment. Investors should have an investment time horizon of at least 5 years. The recommended holding period does not provide any guarantee that the objective will be achieved. This product is eligible for all distribution channels (e.g. investment advice, portfolio management, non-advised sales and pure execution services).

The fund is unlikely to be appropriate for those who:

- Are looking for full capital protection or full repayment of the amount invested, and those who want a guaranteed return
- Have no risk tolerance
- Who are unwilling to accept price fluctuations (volatility) in the value of the fund
