PORTFOLIO MANAGER PERFORMANCE

PORTFOLIO COMMENTARY

The Global Growth Portfolio returned 1.7% in June, taking 2025 returns to 0.1% so far.

Global financial markets in June navigated a challenging environment marked by moderating inflation, resilient labour markets, and persistent geopolitical and trade-related uncertainty. In the US, the Federal Reserve held its policy rate at 4.25%–4.50%, maintaining guidance for two potential cuts later this year, as inflation remained elevated at 2.4%, above the 2% target. The European Central Bank reduced rates by 25 basis points, responding to softening inflation and subdued growth.

Despite heightened volatility, equity markets advanced, supported by robust corporate earnings and continued optimism around AI-led innovation. Veritas benefited from its technology exposure in Taiwan and South Korea, though Alibaba detracted following weaker earnings. Driehaus outperformed its small-cap growth benchmark through strong stock selection in Technology, Healthcare, and Defence. GMO Quality performed in line with its benchmark, aided by tech holdings, but Consumer Staples were a drag. Conversely, Stonehage Fleming Global Best Ideas underperformed, as its defensive positioning lagged in a growth-led market. Our fixed income positions also positively contributed to return with Gilts in particular, on the back of expectations of rate cuts. Fixed income also contributed positively, particularly Gilts, which rallied on rising expectations of rate cuts.

INVESTOR PROFILE

The Fund is appropriate for all investor types, including those with only a basic knowledge of funds, it is compatible with investors who do not need a capital guarantee (investors must be prepared to accept fluctuations in the value of capital, including the ability to bear 100% capital loss) and looking for capital growth. Due to the volatility of markets, investors should be willing to accept price fluctuations in exchange for the opportunity of potentially higher returns. This is a long term investment. Investors should have an investment time horizon of at least 5 years. The recommended holding period does not provide any guarantee that the objective will be achieved. This product is eligible for all distribution channels (e.g. investment advice, portfolio management, non-advised sales and pure execution services).

The fund is unlikely to be appropriate for those who:

- Are looking for full capital protection or full repayment of the amount invested, and those who want a guaranteed return
- Have no risk tolerance
- Who are unwilling to accept price fluctuations (volatility) in the value of the fund
- Do not intend to invest for the long term

RISK PROFILE

The following risks are material:

- The price of units/shares and any income from them may fall as well as rise and investors may not get back the full amount invested. Past performance is not a guide to future performance. There is no assurance that the investment objective of the Fund will actually be achieved.
- Where investments are in the shares of companies (equities), the value of those equities may fluctuate, sometimes dramatically, in response to the activities and results of individual companies or because of general market and economic conditions or other events.
- Investment in other funds may mean that the objectives and risk profiles of those underlying funds may not (always) be fully in line with those of the Fund.

All the risks currently identified as being applicable to the Fund are set out in the 'Risk' section of the Prospectus.

OUTCOME OF FAIR VALUE ASSESSMENTS (2024)

Our assessment confirms:

- The Fund meets the needs of the target market.
- The intended distribution strategy remains appropriate.
- The Fund provides fair value to customers.
