## PORTFOLIO MANAGER PERFORMANCE

## PORTFOLIO COMMENTARY

**The Global Growth Portfolio returned 0.1% in September, taking 2024 returns to 7.9% so far.**

The global economy continued to moderate following strong growth earlier in the year. Inflation and labour market data cooled, prompting the Fed to cut interest rates by half a percentage point. The European economy continues to stagnate as the European Central bank cut rate by 0.25% while UK inflation remained higher, motivating the Bank of England to maintain rates at the current 5% level. Global equities continued to climb, propelled by the start of the US easing cycle and China's latest monetary and fiscal stimulus package.

The equity portfolio posted strong returns with noticeable outperformance in our holdings that benefit from improved market breadth; Sector Healthcare, a key thematic holding outperformed its benchmark as they benefitted from not holding the obesity stocks, Eli Lilly and Novo Nordisk. We saw weaker performance from Stonehage Fleming Global Best Ideas as the sell-off in large cap growth hindered relative performance.

**INVESTOR PROFILE**

The fund is appropriate for all investor types, including those with only a basic knowledge of funds, it is compatible with investors who do not need a capital guarantee (investors must be prepared to accept fluctuations in the value of capital, including the ability to bear 100% capital loss) and looking for capital growth.

Due to the volatility of markets, investors should be willing to accept price fluctuations in exchange for the opportunity of potentially higher returns. This is a long term investment. Investors should have an investment time horizon of at least 5 years. The recommended holding period does not provide any guarantee that the objective will be achieved. This product is eligible for all distribution channels (e.g. investment advice, portfolio management, non-advised sales and pure execution services).

The fund is unlikely to be appropriate for those who:

- Are looking for full capital protection or full repayment of the amount invested, and those who want a guaranteed return
- Have no risk tolerance
- Who are unwilling to accept price fluctuations (volatility) in the value of the fund
