## PORTFOLIO MANAGER PERFORMANCE

## PORTFOLIO COMMENTARY

The Global Multi-Asset Portfolio A USD Class returned -1.4% in August vs -1.7% for the benchmark. Global equities fell in August amid rising sovereign bond yields and soft macroeconomic data in China. The US outperformed international markets, as economic data remained solid, especially within the labour markets as monthly jobs growth remained healthy. Inflation continued to soften in the US, which contrasts to Europe where it remained at an elevated level, adding to stagflationary fears in the region. Emerging markets underperformed as investment activity and retail sales fell sharply in China, despite stimulus efforts from the government.

The equity book delivered negative absolute returns, but fell less than broader equity markets. The more defensive strategies held up well, including Stonehage Global Best Ideas (GBI) and Polar Insurance. We also saw good performance from Driehaus US Small Cap relative to their smaller company universe, as they saw better returns from their biotechnology and personal care holdings. The worst performer over the month was Veritas Asia, which has been more leaning more heavily into the Chinese consumer.

Within the fixed income book, absolute returns were also negative as developed market sovereign bond yields rose with Central Banks suggesting that future rate hikes remain possible. Credit was also weak as risk sentiment turned more negative.

It was a mixed month for the Alternatives book, which was close to flat in aggregate. Weaker performances from the gold position and Marshall Wace ESG TOPS was offset by positive performance from Lyxor Sandler and GAM Star Cat Bond Fund.

## OUTCOME OF FAIR VALUE ASSESSMENTS (2023)

Our assessment confirms:

- The fund meets the needs of the target market.
- The intended distribution strategy remains appropriate.
- The fund provides fair value to customers.

## INVESTOR PROFILE

The fund is appropriate for all investor types, including those with only a basic knowledge of funds. It is compatible with investors who do not need a capital guarantee (investors must be prepared to accept fluctuations in the value of capital, including the ability to bear 100% capital loss) and are looking for capital growth. Due to the volatility of markets, investors should be willing to accept price fluctuations in exchange for the opportunity of potentially higher returns. This is a long term investment and investors should have an investment time horizon of at least 5 years. The recommended holding period does not provide any guarantee that the objective will be achieved. This product is eligible for all distribution channels (e.g. investment advice, portfolio management, non-advised sales and pure execution services).

The fund is unlikely to be appropriate for those who:

- Are looking for full capital protection or full repayment of the amount invested, and those who want a guaranteed return
- Have no risk tolerance
- Who are unwilling to accept price fluctuations (volatility) in the value of the fund
- Do not intend to invest for the long term

## IMPORTANT INFORMATION

This is a marketing communication. Please refer to the prospectus and the KIID of the UCITS before making any final investment decisions. All investments risk the loss of capital. No guarantee or representation is made that the funds will achieve their investment objective. The value of investments may go down as well as up and, for products designed to return income, the distributions can also go down or up and you may not receive back the full value of your initial investment. Derivatives may be used for efficient portfolio management. The fund invests in assets which are denominated in other currencies; hence changes in the relevant exchange rate will affect the value of the investment.
