## PORTFOLIO COMMENTARY

The fund rose in November, outperforming its benchmark. Global equities were flat over the period whilst fixed income markets saw positive returns.

Among equity strategies, our thematic strategies Sector Healthcare and Polar Insurance were notable contributors. Sector Healthcare outperformed its benchmark, with Merck & Co delivering strong returns following upbeat earnings and pipeline progress, while Roche also added positively. Polar Insurance's performance was driven by Arch Capital and Travelers.

Gold extended its strong run, supported by macroeconomic uncertainty, policy shifts, and structural demand from central banks. Fixed income also contributed positively, with U.S. Treasuries the strongest performer.

Portfolio changes within equities included trimming Driehaus and the iShares S&P 500 Equal Weight and adding to Franchise Partners. Within fixed income, we sold the Global Aggregate ETF and the 2040 Treasury, while adding to the iShares Treasury Bond 7–10yr ETF and introducing a short-duration investment grade ETF.

### INVESTOR PROFILE

The Fund is appropriate for all investor types, including those with only a basic knowledge of funds, it is compatible with investors who do not need a capital guarantee (investors must be prepared to accept fluctuations in the value of capital, including the ability to bear 100% capital loss) and looking for capital growth. Due to the volatility of markets, investors should be willing to accept price fluctuations in exchange for the opportunity of potentially higher returns. This is a long term investment. Investors should have an investment time horizon of at least 5 years. The recommended holding period does not provide any guarantee that the objective will be achieved. This product is eligible for all distribution channels (e.g. investment advice, portfolio management, non-advised sales and pure execution services).

The fund is unlikely to be appropriate for those who:

- Are looking for full capital protection or full repayment of the amount invested, and those who want a guaranteed return
- Have no risk tolerance
- Who are unwilling to accept price fluctuations (volatility) in the value of the fund
- Do not intend to invest for the long term

### RISK PROFILE

The Fund is not guaranteed and your investment is at risk. The value of your investment may go down as well as up.

Investments in underlying funds contain the same market and liquidity risks associated with the underlying investments. The Fund may be subject to a liquidity risk due to the manner and timing of potential redemptions from the underlying funds.
