PORTFOLIO COMMENTARY

The Global Multi-Asset Portfolio C GBP Class returned 3.0% in January vs 3.0% for the benchmark.

The global economy was marked by the return of Donald Trump to the White House and his pro-growth political agenda along with him. In the equity market, Europe outperformed the US in a reversal of extended underperformance, as the Euro Area PMI returned to expansionary territory. The emergence of a cheaper Chinese AI competitor, DeepSeek, shook the market in the second half of the month, pushing AI-related stocks lower as investors questioned the relevance of mega-cap stocks' large investments in AI.

The equity portfolio produced strong absolute returns but slightly underperformed global markets, with the fund being underweight Europe and overweight Asia Pacific ex Japan. Man Undervalued Assets also had a more difficult time relative to the UK market due to being underweight larger companies and its focus on value, although it still produced very solid positive returns.

It was a good month for fixed income, with all positions matching or outperforming the global bond market. Our TIPS position and PIMCO Income produced notably strong returns.

Our alternatives portfolio outperformed the broader hedge fund industry, helped by the fund's gold position which resumed its uptrend following a period of consolidation, returning over 7% during the month.

INVESTOR PROFILE

The Fund is appropriate for all investor types, including those with only a basic knowledge of funds. It is compatible with investors who do not need a capital guarantee (investors must be prepared to accept fluctuations in the value of capital, including the ability to bear 100% capital loss) and are looking for capital growth.

Due to the volatility of markets, investors should be willing to accept price fluctuations in exchange for the opportunity of potentially higher returns. This is a long-term investment and investors should have an investment time horizon of at least 5 years. The recommended holding period does not provide any guarantee that the objective will be achieved. This product is eligible for all distribution channels (e.g. investment advice, portfolio management, non-advised sales and pure execution services).

The Fund is unlikely to be appropriate for those who:

- Are looking for full capital protection or full repayment of the amount invested, and those who want a guaranteed return
- Have no risk tolerance
- Who are unwilling to accept price fluctuations (volatility) in the value of the Fund
- Do not intend to invest for the long-term

RISK PROFILE

The Fund is not guaranteed and your investment is at risk. The value of your investment may go down as well as up. The Fund may enter into derivative agreements with counterparties, and consequently there is a risk that a counterparty may fail to meet its obligations. This may lead to delays in the Fund receiving amounts due to it, receiving less than is due or receiving nothing. Investments in underlying funds contain the same market and liquidity risks associated with the underlying investments. The Fund may be subject to a liquidity risk due to the manner and timing of potential redemptions from the underlying funds. Underlying funds may be entitled to delay acceptance of redemption requests or payment of redemption proceeds from the Fund. The Fund may be subject to valuation risk due to the manner and timing of valuations of the Fund's investments. For full details of the Fund's risks, please see the prospectus and supplement sections entitled 'Risk Factors'.

OUTCOME OF FAIR VALUE ASSESSMENTS (2024)

Our assessment confirms:

- The Fund meets the needs of the target market.
- The intended distribution strategy remains appropriate.
- The Fund provides fair value to customers.
