PORTFOLIO COMMENTARY

The Global Multi-Asset Portfolio C GBP Class returned 0.1% in July vs -0.3% for the benchmark.

Both equity and bond markets performed well as expectations for a rate cut, softer inflation and labour market and disappointing earnings from AI companies sparked a market rotation. Large-cap technology and quality growth companies underperformed whilst small-cap and value companies saw a reversal in relative performance, outperforming during the month. US treasuries were boosted by the economic data, with the rally on the front end of the curve causing a steepening of the yield curve.

The equity portfolio performed well in this environment, outperforming global equity markets. The fund benefited from its regional and sector positioning, helped by overweight exposure to the UK, underweight exposure to Emerging Markets and targeted allocations to insurance and health care. Our exposure to smaller companies through the Xtrackers S&P 500 Equal Weight ETF and Man GLG Undervalued Assets also contributed very positively to relative performance. On the weaker side, stock-specific issues were a modest drag on the performance of Stonehage Fleming Global Best Ideas.

Our fixed income portfolio also outperformed global bond markets, most benefiting from the longer duration position in the 2040 Treasury.

Alternatives had another good month with gold contributing well to performance.

OUTCOME OF FAIR VALUE ASSESSMENTS (2023)

Our assessment confirms:

- The fund meets the needs of the target market.
- The intended distribution strategy remains appropriate.
- The fund provides fair value to customers.

INVESTOR PROFILE

The fund is appropriate for all investor types, including those with only a basic knowledge of funds. It is compatible with investors who do not need a capital guarantee (investors must be prepared to accept fluctuations in the value of capital, including the ability to bear 100% capital loss) and are looking for capital growth. Due to the volatility of markets, investors should be willing to accept price fluctuations in exchange for the opportunity of potentially higher returns. This is a long term investment and investors should have an investment time horizon of at least 5 years. The recommended holding period does not provide any guarantee that the objective will be achieved. This product is eligible for all distribution channels (e.g. investment advice, portfolio management, non-advised sales and pure execution services).

The fund is unlikely to be appropriate for those who:

- Are looking for full capital protection or full repayment of the amount invested, and those who want a guaranteed return
- Have no risk tolerance
- Who are unwilling to accept price fluctuations (volatility) in the value of the fund
- Do not intend to invest for the long term
