INVESTMENT OBJECTIVE

The Fund aims to achieve capital growth over the longer term by investing in companies that are progressively becoming more sustainable therefore creating a portfolio that is aligned to the UN Sustainable Development Goals**.

INVESTMENT STRATEGY

- We construct globally-orientated portfolios of long-term investment ideas.
- We blend passive, factor and active market exposure targeting a strong performing yet impactful portfolio.
- We are conviction led investors with all investments carefully assessed for purpose and purity.

MANAGER PERFORMANCE HIGHLIGHTS

The Fund delivered positive absolute returns in Q1 as investors remained hopeful of a soft landing in the US and economic data remained resilient. There were many echoes of 2023 with US markets performing particularly well, continued optimism around AI and GLP-1s, and the largest companies contributing disproportionately to equity market returns (although not to the same extent as 2023).

The Fund remains a blend between strategies targeting positive impact and those strategies with strong environmental, social and governance credentials but have less of a direct impact objective. As was the case in both 2022 and 2023, it was the latter group which delivered the best performance over the period. One member of this group is Findlay Park, the single US active manager held, benefitted from having exposure to the AI theme with a position in NVIDIA. They also continue to benefit from their holding in TopBuild, a leading insulation installation provider, which reported healthy growth and profitability numbers at the beginning of 2024. We are cognisant of the important role that energy efficiency will play as part of limiting total energy consumption with buildings today accounting for c.30% of global emissions - it is pleasing to see managers finding profitable investment opportunities in these areas.

Whilst all equity strategies held delivered positive returns over the period, it was those strategies with a greater focus on sustainable investments which struggled to keep up in a fast rising market. Part of the reason for this is the environmental space remains sensitive to changes in US yields, or in another words borrowing costs, and this was a tailwind in the last quarter of 2023 but a slight headwind in this quarter as yields rose. Our base case is for central banks to start cutting this year and yields to not push up significantly from these levels, and hence limit the risk of this being a continued headwind to the environmental space.

OUTCOME OF FAIR VALUE ASSESSMENTS (2023)

Our assessment confirms:

- The fund meets the needs of the target market.
- The intended distribution strategy remains appropriate.
- The fund provides fair value to customers.

INVESTOR PROFILE

The fund is appropriate for all investor types, including those with only a basic knowledge of funds. It is compatible with investors who do not need a capital guarantee (investors must be prepared to accept fluctuations in the value of capital, including the ability to bear 100% capital loss) and are looking for capital growth. Due to the volatility of markets, investors should be willing to accept price fluctuations in exchange for the opportunity of potentially higher returns. This is a long term investment and investors should have an investment time horizon of at least 5 years. The recommended holding period does not provide any guarantee that the objective will be achieved. This product is eligible for all distribution channels (e.g. investment advice, portfolio management, non-advised sales and pure execution services).

The fund is unlikely to be appropriate for those who:

- Are looking for full capital protection or full repayment of the amount invested, and those who want a guaranteed return
- Have no risk tolerance
- Who are unwilling to accept price fluctuations (volatility) in the value of the fund
- Do not intend to invest for the long term
