Depository: Northern Trust Fiduciary Services (Ireland) Limited (the "Depository")

What is this product?

Type: The Fund is domiciled in Ireland and is an open-ended investment company ("OEIC") and qualifies as an undertaking for collective investment in transferable securities ("UCITS").

Intended retail investor: The Fund is suitable for investors seeking long-term capital appreciation with an initial subscription of GBP 3,500,000. In addition Share Classes may be offered to investors who will invest within the first three months of the establishment of the Fund and institutional investors thereafter.

Term: This Fund has no maturity date.

Objectives:

The investment objective of the Fund is to achieve capital growth over the longer term by investing in a blend of collective investment schemes which either have a sustainable investment objective or promote environmental and/or social characteristics.

The Fund performance will be measured against the MSCI All Countries World (ACWI) Net Total Return Index (the "Benchmark") and the MSCI ACWI Sustainable Development Index USD Net Total Return (the "Secondary Benchmark") together referred to as the "Benchmarks".

The Fund is considered to be actively managed in reference to the Benchmarks by virtue of the fact that it uses the Benchmarks for performance comparison purposes. Certain elements of the Fund's securities may be components of and may have similar weightings to the Benchmarks. However the Benchmarks are not used to define the portfolio composition of the Fund or as a performance target and the Fund may be wholly invested in securities which are not constituents of the Benchmarks.

In seeking to achieve its investment objective, the Fund will invest predominantly in a range of underlying collective investment schemes (the "Underlying Funds") which comply with the Central Bank's requirements as regards investment by a UCITS in other collective investment schemes and where such Underlying Funds provide exposure to a portfolio of assets comprising mostly global equities and equity related securities (which may be listed or traded on Recognised Exchanges or unlisted) and cash.

Such Underlying Funds may also provide exposure to other elements, being bonds (including corporate debt securities and bonds issued by sovereign, supranational entities and/or corporate issuers rated investment grade at time of purchase from either Moody's or another generally recognised international rating agency), non-investment grade debt, emerging markets, and infrastructure exposure (e.g. solar and wind power generation), subject to and in accordance with the investment restrictions set out in the Prospectus.

What are the risks and what could I get in return?

Risk indicator

The risk indicator assumes you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less than your original investment. In addition to the market price risk, please refer to the Fund's Prospectus for further information.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class.

This rates the potential losses from future performance at a medium level, and poor market conditions could impact the Fund's capacity to pay you.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

The value of your investment may fall and you may not get back the amount you invested.

Sustainability Risk - The fund may be subject to sustainability risk, meaning an environmental, social or governance ("ESG") event or condition that, if it occurs, could cause an actual or a potential material negative impact on the value of an investment.

Performance scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The figures shown include all the costs of the product itself, but do not take into account your personal tax situation and may not include all the costs that you pay to your advisor or distributor, which may also affect how much you get back.

The stress scenario shows what you might get back in extreme market circumstances.

The unfavourable, moderate, and favourable scenarios shown are illustrations of what you might get back using the worst, average, and best performance of the product / a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

Investment: GBP 10,000			
Scenarios		If you exit after 1 year	If you exit after 5 years (recommended holding period)

What happens if Carne Global Fund Managers (Ireland) Limited is unable to pay out?

The assets and liabilities of the Fund are segregated from those of the PRIIP Manufacturer. The assets of the Fund are held in safekeeping by the Depositary. In the event of the insolvency of the PRIIP Manufacturer, the Fund's assets in the safekeeping of the Depositary will not be affected. In the event of the insolvency of the Depositary, you may suffer financial loss. There is no compensation or guarantee scheme in place which may offset, all or any of, your loss.

What are the costs?

Costs over time

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- o In the first year you would get back the amount that you invested (0% annual return)
- o For the other holding periods we have assumed the product performs as shown in the moderate scenario
- o GBP 10,000 is invested

Investment: GBP 10,000		
	If you exit after 1 year	If you exit after 5 years (recommended holding period)
Total costs	GBP 116	GBP 738
Annual cost impact(*)	1.16%	1.16%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 6.74% before costs and 5.58% after costs.

Composition of costs

If you exit after 1 year			
One-off costs upon entry or exit	Entry costs	We do not charge an entry fee.	GBP 0
	Exit costs	We do not charge an exit fee for this product, but the person selling you the product may do so.	GBP 0
