FUND MANAGER

PAUL MUMFORD

Paul Mumford has extensive investment experience. Having worked initially as an Analyst for Norris Oakley Brothers and later as a smaller companies expert at R Nivison, he moved to fund management in 1988 when he joined Glenfriars. He then joined Cavendish Asset Management at the group's formation in 1994. The acquisition of Cavendish Asset Management was made by Stonehage Fleming in July 2020. Paul is the co-manager of the TM Stonehage Fleming Aim Fund and the TM Stonehage Fleming Opportunities Fund.

NICK BURCHETT

This partnership made a compelling proposition and after 27 years at Investec he joined Cavendish Asset Management in November 2017 to jointly manage the funds. The acquisition of Cavendish Asset Management was made by Stonehage Fleming in July 2020. Nick is the co-manager of the TM Stonehage Fleming Aim Fund and the TM Stonehage Fleming Opportunities Fund.

PORTFOLIO COMMENTARY

During the month of July the Numis Alternative Markets (incl. investment companies) Index declined by 0.1% and the TM Stonehage Fleming Aim Fund slightly underperformed and was down by 0.9%.

We reduced several holdings during the month and completely sold our small holding in Tiny Build and also Nexus at the top of its trading range. A new holding was taken in Animalcare, the veterinary product company, where we participated in a placing at a large discount to the current market price. The other new holding was Microlise which is a UK leader in logistics software which came as an IPO on AIM. By way of fine tuning, apart from trimming some holdings, others were increased.

The summer months can be a quiet period in the stock market and many companies have by now produced their half-year results. The trend has largely been positive with several companies exceeding pre-Covid results. Understandably, company

directors have adopted elements of a cautious approach, but a positive sign is that in a number of cases guidance is being re-introduced in outlook statements. There are still some restrictions in place but generally the exit from lockdown is well advanced. Consumer spending has increased and inflation is creeping back into the economy. Even the ending of the stamp duty holiday has not materially affected the strong housing market. Raw material prices have moved higher, as have energy costs. Of particular note is the huge rise in the price of natural gas, where we are well represented in the portfolio. Another emerging factor is an increase in takeover activity which demonstrates that there is good value to be had at current levels. The low level of interest rates and healthy balance sheets suggest that organic growth or via acquisition could be a feature moving forward. Our overall view is that there are many stocks held within the portfolio which will drive the long-term performance.

IMPORTANT INFORMATION

Derivatives have not been used but are allowed if appropriate for efficient asset management. The Fund only invests in UK assets but is allowed to hold shares on overseas exchanges. This would occur in the event of a company delisting from the London stock market and would not be expected to be material. Hence, there would be limited foreign exchange risk.

The fund invests in a broad range of AIM listed companies and some of these carry a higher risk of failure and may be less liquid than shares listed on other exchanges. These shares may be also harder to sell quickly because of this lower liquidity. AIM listed companies may also experience greater price volatility which could also affect the value of the fund.
