INVESTMENT OBJECTIVE

The Fund aims to achieve long-term capital growth.

INVESTMENT POLICY

The Fund aims to invest mainly in equities on the UK Alternative Investment Market ('AIM'). This will be achieved by an actively managed diversified portfolio of shares spread across any sector of AIM. In addition, the Fund may on occasion invest in fully listed shares of companies with smaller market capitalisations.

PORTFOLIO COMMENTARY

The surprise US aerial attack on Iran nuclear facilities following renewed and heightened hostilities between Israel and Iran were the events which might have caused the most uncertainty in the month. Oil prices spiked but fell back to more normal levels when it was announced this was a 'one-off' event designed to encourage peace talks to commence. Elsewhere, conflicts continue in Ukraine and Gaza with the result that following a NATO summit in the Hague the member countries have committed to increased defence spending budgets. On the economic front, UK inflation in May was 3.4% against 3.5% in the previous month to reflect the higher cost of the UK Budget and uncertainty of Trump Tariffs. GDP in the first quarter of 2025 showed positive growth of 0.7% which was slightly better than forecast. Interest rates both in the UK and US remained unchanged and Sterling strengthened which was more to do with a weakness in the US Dollar. Positive news was the proposed trade deal between the United Kingdom and the United States of America and subsequently the UK stock market was very resilient in the month. More importantly, sentiment improved for UK smaller companies and the fund saw a substantial out-performance which was helped by positive company results from a number of our holdings.

During the month we received proceeds from the cash take-over of our holding in Induction Healthcare. Due to its size, for technical reasons we continued to reduce our holding in MS International. We made small additions to Inspiration Healthcare (medical equipment), Ashted Tech (energy services) and Zoo Digital (media) but otherwise, made no significant additions. Gamma Communications has moved from AIM to the main market and we will sell our interest when we feel that the potential is fully reflected in the share price. A similar policy will be adopted with any other holdings should they make a similar move. There is likely to be an increasing scarcity in good quality AIM shares and these are likely to be in great demand by specialist IHT funds. Our portfolio is well placed to take advantage and we would look for out-performance over the short, medium and longer term.

- The intended distribution strategy remains appropriate.
- The Fund provides fair value to customers.

AWARDS

RISK PROFILE

Class C, Class L, Class Y, Class B

The following risks are material:

- The price of units/shares and any income from them may fall as well as rise and investors may not get back the full amount invested. Past performance is not a guide to future performance. There is no assurance that the investment objective of the Fund will actually be achieved.
- Where investments are in the shares of companies (equities), the value of those equities may fluctuate, sometimes dramatically, in response to the activities and results of individual companies or because of general market and economic conditions or other events.
- Significant exposure to a particular industrial sector or geographical region puts the Fund at risk of a localised event making a significant impact on the value of the Fund.

- Shares purchased on the AIM markets (especially those known as 'penny shares') carry a higher degree of risk of losing money than other UK shares.
- The requirements on companies that are listed on AIM market are less stringent than those for companies with a full market listing.
- There is usually a wider spread between the buying price and the selling price of these shares if they have to be sold quickly.
- There may be difficulty or delay in buying and selling shares due to a low level of trading activity on the AIM market (referred to as lack of liquidity).
- The businesses and companies are subject to higher risk of failure and so the risk of insolvency is also higher for these type of shares. This could mean that you lose all or significantly large part of the investment is shares of companies which are insolvent.

All the risks currently identified as being applicable to the Fund are set out in the 'Risk' section of the Prospectus.

TM STONEHAGE FLEMING AIM FUND

INVESTOR PROFILE

The Fund is appropriate for all investor types, including those with only a basic knowledge of funds. It is compatible with investors who do not need a capital guarantee (investors must be prepared to accept fluctuations in the value of capital, including the ability to bear 100% capital loss) and are seeking capital growth. Due to the volatility of markets, investors should be willing to accept price fluctuations in exchange for the opportunity of potentially higher returns. This is a long term investment and investors should have an investment time horizon of at least 5 years. The recommended holding period does not provide any guarantee that the objective will be achieved. This product is eligible for all distribution channels (e.g. investment advice, portfolio management, non-advised sales and pure execution services).

The Fund is unlikely to be appropriate for those who:

- Are looking for full capital protection or full repayment of the amount invested, and those who want a guaranteed return
- Have no risk tolerance
- Who are unwilling to accept price fluctuations (volatility) in the value of the Fund
- Do not intend to invest for the long term

IMPORTANT INFORMATION

This is a marketing communication issued by Stonehage Fleming Investment Management Limited (SFIM). SFIM is the Investment Manager of the Fund, authorised and regulated in the UK by the Financial Conduct Authority (FRN: 194382). The distribution or possession of this document in jurisdictions outside the United Kingdom may be restricted by law or other regulatory requirements. For details of the Funds investment policy, please see the Investment Objective and Policy section of the Fund Prospectus Document.

All investments risk the loss of capital. No guarantee or representation is made that the Fund will achieve its investment objective. The value of investments may go down as well as up.

For products designed to return income, the distributions can also go down or up and you may not receive back the full value of your initial investment. Derivatives have not been used but are allowed if appropriate for efficient asset management. The Fund only invests in UK assets but is allowed to hold shares on overseas exchanges. This would occur in the event of a company delisting from the London stock market and would not be expected to be material. Hence, there would be limited foreign exchange risk. Past performance is not a guide to future returns. If the information is not displayed in your base currency, then the return may increase or decrease due to currency fluctuations.
