## TM Stonehage Fleming Global Balanced Portfolio Fund Class A

A sub Fund of the TM Stonehage Fleming Global Multi-Asset Umbrella Fund

This Fund is managed by Thesis Unit Trust Management Limited

ISIN (Income): GB00B3QRG186

### Objectives and Investment Policy

The Investment Objective of the Fund is to preserve capital in the medium term and to achieve capital growth in real terms over the longer term, whilst generating moderate levels of income.

The fund will predominantly invest into a range of underlying funds and offshore funds which qualify for distributor status (or the equivalent under the new reporting fund regime legislation) with a view to gaining exposure to a portfolio of assets which comprises global equities, cash and bonds, but which may also contain other elements including, without limitation, (listed) hedge funds, venture capital, commodities, infrastructure and property exposure, in each case in accordance with the fund's investment and borrowing powers. The fund may also invest directly in these asset classes, again in accordance with its investment and borrowing powers.

The Investment Manager anticipates that a portion of the fund may be invested in units or shares of collective investment schemes managed or operated by the Investment Manager. The Investment Manager may also make use of some derivative/option facilities where considered prudent for investment purposes.

In support of the fund's objective to preserve capital in the medium term, the Investment Manager will employ a number of techniques and procedures, which may without limitation include: (i) maintaining a diversified spread of assets with varying return and risk profiles to reduce security specific risk and generate streams of growth from independent and uncorrelated sources; (ii) maintaining a prudent level of cash and fixed interest assets as portfolio stabilisation anchors within the portfolio; (iii) the use of hedging strategies to protect against capital drawdown in respect of riskier assets; and (iv) at times of high capital risk, reduced exposure to riskier assets in favour of cash and sovereign bonds.

The fund uses a benchmark for performance comparison purposes using the Asset Risk Consulting GBP Balanced Asset Index. The benchmark is not a target benchmark and the fund is not constrained by it.

The index has been selected as a benchmark for performance as an aggregation of a large number of Sterling based multi-asset mandates in the industry with a similar level of volatility, they offer a clear comparator.

The base currency of the Fund is pounds sterling.

Income arising from the Fund is distributed to the holders of income shares. Investors can buy and sell shares on demand when the scheme prices daily at 10.30 pm.

### Risk and Reward Profile

The risk rating of the Fund is category 4 due to the volatility of the Fund price which sits in a range of between 5% and 10%. The risk rating is calculated using historical data and a prescribed standard deviation methodology.

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may shift over time.
- The lowest category does not mean 'risk free'.
- This indicator is not a measure of the risk that you may lose the amount you have invested.

The following risks are material in addition to the risks captured by the indicator above:

- The price of units/shares and any income from them may fall as well as rise and investors may not get back the full amount invested. Past performance is not a guide to future performance. There is no assurance that the investment objective of the Fund will actually be achieved.
- Where investments are in the shares of companies (equities), the value of those equities may fluctuate, sometimes dramatically, in response to the activities and results of individual companies or because of general market and economic conditions or other events.
- Investment in other funds may mean that the objectives and risk profiles of those underlying funds may not (always) be fully in line with those of the Fund.
- More political, economic or structural challenges face emerging markets or less developed countries than developed countries which may increase volatility and uncertainty.
- Where derivative or structured product investments in the Fund may include a counterparty, there is a risk that the counterparty will not fulfil their obligation.
- This Fund is allowed to use derivatives to achieve its objective. Derivatives can cause a Fund to become leveraged. Leverage occurs when exposure to an area invested in is greater than its amount invested, resulting in the Fund being exposed to a potentially greater loss than the initial investment.

All the risks currently identified as being applicable to the Fund are set out in the 'Risk' section of the Prospectus.

## Charges for this Fund

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry Charge	5.00%
Exit Charge	5.00%
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investments are paid out	
Ongoing charges	0.99%
Charges taken from the Fund under certain specific conditions
