

TM STONEHAGE FLEMING INTERNATIONAL FUND

OUR FOUR FUNDAMENTAL QUALITY
PILLARS - IDENTIFYING
GLOBAL BEST-IN-CLASS BUSINESSES

INVESTMENT OBJECTIVE

To achieve long-term growth in capital and income in a focused portfolio of high quality listed businesses from around the world.

INVESTMENT PHILOSOPHY

We invest in best in class businesses for their quality, strategic competitive edge and value.

FUND COMMENTARY

The recovery in world stock markets since the 8 April announcement of the tariff negotiation period continued in August, following the relatively rare occurrence of May, June and July experiencing positive returns. The initial relief rally has evolved into a fundamental based one with US second quarter GDP revised upwards to +3.3%, a strong second quarter reporting season, attempts to make progress on resolving the Ukraine war and the Jackson Hole meetings with the Fed Chair indicating that he is slowly becoming more dovish. The market concluded that the next Fed rate cut is getting closer.

The benefits of the weaker US dollar started materialising in the second-quarter US reporting season, which is now almost done, with S&P 500 Index Revenue and Earnings respectively growing +6% and +12%, respectively reflecting +2% and +8% upside surprises. Along with this, margin expansion continued, particularly amongst the technology leaders.

The best contributors to fund performance have been Alphabet, Copart and ASML. The common theme between Alphabet and ASML is the AI boom that has been a dominant feature of the reporting season. This was well reflected in the semi-conductor and cloud sectors. Further to this, Alphabet is demonstrating stronger than expected AI capability with their Gemini developments, and has won cloud business from peers Open AI and Meta. ASML benefitted from customers making spending commitments. Copart is turning for the better after a severe sell-off.

The largest detractors from performance have been Microsoft, Eaton and Amazon. Microsoft's share responded well to the particularly strong growth in its Azure cloud business, but the stock subsequently drifted lower due to profit taking and some reservations around its strategic relationship with Open AI. Eaton reported good results, but disappointed in its outlook statement. Amazon had in essence flat stock performance following AWS's growth in line with expectations.

INVESTMENT STRATEGY

- Invest for sustainable growth
- Fundamental research driven
- Particular focus on quality of management, balance sheet strength, return on invested capital, free cash flow, ability to grow dividends each year
- Bottom-up approach to identify exceptional businesses
- Global orientation, with emerging market exposure
- High conviction concentrated portfolio
- Predominantly larger capitalisation businesses, also consider exceptional medium-sized ones
- Buy to hold and disciplined selling
- No benchmark orientation, no active trading, no leverage, no hedging

OUTCOME OF FAIR VALUE ASSESSMENTS (2024)

- The fund meets the needs of the target market.
- The intended distribution strategy remains appropriate.
- Historically, the fund did not deliver value for money. In response, as of the 2nd August 2023, Stonehage Fleming Investment Management Limited changed the personnel managing the fund and the approach to investment selection. The fund will follow the strategy pursued by the Stonehage Fleming Global best ideas fund (GBI), and own the same quality growth business as this fund. The historic performance of GBI, together with more information on the manager, can be found at www.stonehagefleming.com/GBI

INVESTOR PROFILE

The fund is appropriate for all investor types, including those with only a basic knowledge of funds. It is compatible with investors who do not need a capital guarantee (investors must be prepared to accept fluctuations in the value of capital, including the ability to bear 100% capital loss) and are seeking capital growth. Due to the volatility of markets, investors should be willing to accept price fluctuations in exchange for the opportunity of potentially higher returns. This is a long term investment and investors should have an investment time horizon of at least 5 years. The recommended holding period does not provide any guarantee that the objective will be achieved. This product is eligible for all distribution channels (e.g. investment advice, portfolio management, non-advised sales and pure execution services).

The fund is unlikely to be appropriate for those who:

- Are looking for full capital protection or full repayment of the amount invested, and those who want a guaranteed return
- Have no risk tolerance
- Who are unwilling to accept price fluctuations (volatility) in the value of the fund
- Do not intend to invest for the long term

RISK PROFILE

The following risks are material:

- The price of units/shares and any income from them may fall as well as rise and investors may not get back the full amount invested. Past performance is not a guide to future performance. There is no assurance that the investment objective of the Fund will actually be achieved.
- Where investments are in the shares of companies (equities), the value of those equities may fluctuate, sometimes dramatically, in response to the activities and results of individual companies or because of general market and economic conditions or other events.
- Where derivative investments in the Fund may include a counterparty, there is a risk that the counterparty will not fulfil their obligation.
- The Fund may use derivatives to reduce costs, overall risk and/or generate additional capital or income. This is known as Efficient Portfolio Management (EPM). When used for EPM purposes, there should not be an increase in the overall risk level of the Fund.
- More political, economic or structural challenges face emerging markets or less developed countries than developed countries which may increase volatility and uncertainty.
- Where investments in the Fund are in currencies other than your own, changes in exchange rates may affect the value of your investments.
- Significant exposure to a particular industrial sector or geographical region puts the Fund at risk of a localised event making a significant impact on the value of the Fund.

All the risks currently identified as being applicable to the Fund are set out in the 'Risk' section of the Prospectus.

FUND INFORMATION

Total Net Assets	£300.8m

Synthetic Risk & Reward Indicator (SRRI) rating	5
Annual Management Fee	0.60%
Total Ongoing Charge (OCF ²)	0.64%
Min Initial Investment (GBP)	£50,000
Registered for Sale	UK

¹ Active Share measures how much the portfolio holdings differ from the benchmark index (MSCI World) ie. a portfolio that is identical to the benchmark would have 0% active share. ² The OCF is the Annual Management Fee plus additional fund expenses as a percentage of the assets of the fund. This gives an indication of annual expenses. This figure may vary over time. It excludes portfolio transaction costs.

IMPORTANT INFORMATION

This is a marketing communication issued by Stonehage Fleming Investment Management Limited (SFIM). SFIM is the investment manager of the Fund, authorised and regulated in the UK by the Financial Conduct Authority (FRN. 194382). The distribution or possession of this document in jurisdictions outside the United Kingdom may be restricted by law or other regulatory requirements. For details of the Funds investment policy, please see the Investment Objective and Policy section of the Fund Prospectus Document.

All investments risk the loss of capital. No guarantee or representation is made that the Fund will achieve its investment objective. The value of investments may go down as well as up. For products designed to return income, the distributions can also go down or up and you may not receive back the full value of your initial investment. Derivatives may be used for efficient portfolio management. The Fund invests in assets which are denominated in other currencies; hence changes in the relevant exchange rate will affect the value of the investment. Past performance is not a guide to future returns. If the information is not displayed in your base currency, then the return may increase or decrease due to currency fluctuations.
