

TM STONEHAGE FLEMING INTERNATIONAL FUND

OUR FOUR FUNDAMENTAL QUALITY
PILLARS - IDENTIFYING
GLOBAL BEST-IN-CLASS BUSINESSES

INVESTMENT OBJECTIVE

To achieve long-term growth in capital and income in a focused portfolio of high quality listed businesses from around the world.

INVESTMENT PHILOSOPHY

We invest in best in class businesses for their quality, strategic competitive edge and value.

FUND COMMENTARY

The stock market relief rally continued in July, having started with the announcement in April of the 90-day tariff negotiation period. More tariff agreements have since been reached, most notably with China and the European Union. The US economic recovery in the second quarter further supported investment sentiment with US GDP recovering from -0.5% to +3.0%.

Two thirds of the S&P 500 constituents have reported their second calendar quarter results at the time of writing. On a consolidated basis, Revenue/Earnings grew +6%/+9% respectively, with strong surprise factors of +3%/+8% respectively. We consider there to be three main fundamental features with these results. The weak Dollar has, for the first time since 2022, become a tailwind, to the order of ~2%. Further to this, operational efficiencies continue to improve, particularly so in technology related businesses. Lastly, it has become apparent that AI activity is increasing at a rapid rate, to the benefit of those demonstrating their active participation in AI, reflected in their share prices. Any disappointment on this front (or indeed any other) has been severely punished.

The best contributors to performance have been Cadence Design Systems, Alphabet and EssilorLuxottica, all following from strong results. Cadence, in particular, benefits from the strong AI and semiconductor cycle, and the lifting of US sanctions on their services to Chinese clients. Whilst Alphabet succeeded in continuing to grow their advertising income in double digits, their leading AI infrastructure and AI solutions are attracting large customers and result in Google Cloud further boosting the group profitability. The success of EssilorLuxottica's smart glasses is starting to reflect in group results.

The largest detractors from performance have been Netflix, Verisk Analytics, and ASML. Despite its strong results, profit taking following the earlier strong performance brought down Netflix's share price. Verisk announced fair results, but announced an acquisition of which the strategic fit is not immediately apparent. Tariff and client uncertainties continue to weigh on ASML's share performance.

INVESTMENT STRATEGY

- Invest for sustainable growth
- Fundamental research driven
- Particular focus on quality of management, balance sheet strength, return on invested capital, free cash flow, ability to grow dividends each year
- Bottom-up approach to identify exceptional businesses
- Global orientation, with emerging market exposure
- High conviction concentrated portfolio
- Predominantly larger capitalisation businesses, also consider exceptional medium-sized ones
- Buy to hold and disciplined selling
- No benchmark orientation, no active trading, no leverage, no hedging

OUTCOME OF FAIR VALUE ASSESSMENTS (2024)

- The fund meets the needs of the target market.
- The intended distribution strategy remains appropriate.
- Historically, the fund did not deliver value for money. In response, as of the 2nd August 2023, Stonehage Fleming Investment Management Limited changed the personnel managing the fund and the approach to investment selection. The fund will follow the strategy pursued by the Stonehage Fleming Global best ideas fund (GBI), and own the same quality growth business as this fund. The historic performance of GBI, together with more information on the manager, can be found at www.stonehagefleming.com/GBI

INVESTOR PROFILE

The fund is appropriate for all investor types, including those with only a basic knowledge of funds. It is compatible with investors who do not need a capital guarantee (investors must be prepared to accept fluctuations in the value of capital, including the ability to bear 100% capital loss) and are seeking capital growth. Due to the volatility of markets, investors should be willing to accept price fluctuations in exchange for the opportunity of potentially higher returns. This is a long term investment and investors should have an investment time horizon of at least 5 years. The recommended holding period does not provide any guarantee that the objective will be achieved. This product is eligible for all distribution channels (e.g. investment advice, portfolio management, non-advised sales and pure execution services).

The fund is unlikely to be appropriate for those who:

- Are looking for full capital protection or full repayment of the amount invested, and those who want a guaranteed return
- Have no risk tolerance
- Who are unwilling to accept price fluctuations (volatility) in the value of the fund
- Do not intend to invest for the long term

RISK PROFILE

The following risks are material:

- The price of units/shares and any income from them may fall as well as rise and investors may not get back the full amount invested. Past performance is not a guide to future performance. There is no assurance that the investment objective of the Fund will actually be achieved.
- Where investments are in the shares of companies (equities), the value of those equities may fluctuate, sometimes dramatically, in response to the activities and results of individual companies or because of general market and economic conditions or other events.
- Where derivative investments in the Fund may include a counterparty, there is a risk that the counterparty will not fulfil their obligation.
- The Fund may use derivatives to reduce costs, overall risk and/or generate additional capital or income. This is known as Efficient Portfolio Management (EPM). When used for EPM purposes, there should not be an increase in the overall risk level of the Fund.
- More political, economic or structural challenges face emerging markets or less developed countries than developed countries which may increase volatility and uncertainty.
- Where investments in the Fund are in currencies other than your own, changes in exchange rates may affect the value of your investments.
- Significant exposure to a particular industrial sector or geographical region puts the Fund at risk of a localised event making a significant impact on the value of the Fund.

All the risks currently identified as being applicable to the Fund are set out in the 'Risk' section of the Prospectus.

FUND INFORMATION

Total Net Assets	£301.3m

IMPORTANT INFORMATION

This is a marketing communication issued by Stonehage Fleming Investment Management Limited (SFIM). SFIM is the investment manager of the Fund, authorised and regulated in the UK by the Financial Conduct Authority (FRN. 194382). The distribution or possession of this document in jurisdictions outside the United Kingdom may be restricted by law or other regulatory requirements. For details of the Funds investment policy, please see the Investment Objective and Policy section of the Fund Prospectus Document.

All investments risk the loss of capital. No guarantee or representation is made that the Fund will achieve its investment objective. The value of investments may go down as well as up. For products designed to return income, the distributions can also go down or up and you may not receive back the full value of your initial investment. Derivatives may be used for efficient portfolio management. The Fund invests in assets which are denominated in other currencies; hence changes in the relevant exchange rate will affect the value of the investment. Past performance is not a guide to future returns. If the information is not displayed in your base currency, then the return may increase or decrease due to currency fluctuations.

Whilst every effort is made to ensure that the information provided to clients is accurate and up to date, some of the information may be rendered inaccurate by changes in applicable laws and regulations that may be subject to change in the future. The information in this document does not constitute legal, tax, or a personal recommendation. You must not, therefore, rely on the content of this document when making any investment decisions.
