FUND COMMENTARY

Global equity markets reacted positively in May to the marginal drop of -0.1% in US headline inflation, with their bond yields following suit and drifting lower over the month. Investor sentiment was further supported by a good first quarter US reporting season. Both the overall S&P 500 revenue and earnings indices delivered positive surprises, respectively to the order of +1% and +8% compared to consensus expectations.

Investors are also very aware that the US labour market is cooling with job openings and wage growth continuing to drift lower and consumer sentiment weakening. Whilst earlier in the year a 'no landing' economic scenario became a popular view, we believe this optimism is currently in process of softening somewhat. Amongst the company results there were a number of strong reports, but some with a more reserved outlook. Many of those shares were heavily punished, with Salesforce (not a fund holding), a good example in the Quality Growth space. Their revenue increased by +11% and their operating margin increased by +4.5%, but they guided a lower revenue figure of 7% - 8% for the next quarter. The stock dropped by -20% the next day.

The most negative contributors to performance in the fund have been Estée Lauder, LVMH and McDonald's. Estée Lauder's profit recovery seems to be on track, but they cut their revenue guidance on a continuing weak mainland China market (whilst their international travel channel sales are recovering sharply). LVMH softened on its rival Chanel's comments of them 'entering a more challenging environment following three years of exceptional growth'. McDonald's experiences a challenging trading environment in the Middle East and a reduction of spending power at the lower end of the US consumer market.

The best positive contributors to performance were Verisk Analytics, Microsoft and Alphabet. Verisk's revenue increased a solid +8%, along with strong margin expansion and +20% earnings growth. Microsoft recovered off a relatively low base. Alphabet continues performing well on their strong earnings report and growing investor confidence in their AI capabilities.

The Fund may hold a relatively small number of stocks as compared to many other funds. This may make the Fund's performance more volatile than would be the case if it had a more diversified investment portfolio. OUTCOME OF FAIR VALUE ASSESSMENTS (2023)

- The fund meets the needs of the target market.
- The intended distribution strategy remains appropriate.
- Historically, the fund did not deliver value for money. In response, as of the 2nd August 2023, Stonehage Fleming Investment Management Limited changed the personnel managing the fund and the approach to investment selection. The fund will follow the strategy pursued by the Stonehage Fleming Global best ideas fund (GBI), and own the same quality growth business as this fund. The historic performance of GBI, together with more information on the manager, can be found at www.stonehagefleming.com/GBI

INVESTOR PROFILE

The fund is appropriate for all investor types, including those with only a basic knowledge of funds. It is compatible with investors who do not need a capital guarantee (investors must be prepared to accept fluctuations in the value of capital, including the ability to bear 100% capital loss) and are seeking capital growth. Due to the volatility of markets, investors should be willing to accept price fluctuations in exchange for the opportunity of potentially higher returns. This is a long term investment and investors should have an investment time horizon of at least 5 years. The recommended holding period does not provide any guarantee that the objective will be achieved. This product is eligible for all distribution channels (e.g. investment advice, portfolio management, non-advised sales and pure execution services).

The fund is unlikely to be appropriate for those who:

- Are looking for full capital protection or full repayment of the amount invested, and those who want a guaranteed return
- Have no risk tolerance
- Who are unwilling to accept price fluctuations (volatility) in the value of the fund
- Do not intend to invest for the long term
